

SOLAR PANEL CARRIER INSTRUCTIONS

REIMANN & GEORGER CORPORATION
HOISTING PRODUCTS
P/N 6-----

BUFFALO, NY
4/5/13

INSTALLATION AND SETUP

1. Assemble the solar panel carrier as shown in Figures 1A & 1B. Do not tighten all of the hardware. The solar panel carrier can be used on a 200 and 400 pound capacity hoist. If mounting onto a 200 pound carrier, use the inner two holes on the frame tubes (1) and on the adjusting angle (6). If mounting to a 400 pound carrier, use the outer holes on the frame tubes and adjusting angle to mount onto the carriage.
2. Mount the carrier onto the carriage as shown in Figure 2. Once the carrier is mounted onto the carriage, tighten all of the hardware.
3. When placing a solar panel onto the carrier, the spring clamps (2) can be adjusted accordingly to fit the width of the solar panel. Also, the adjusting angle (6) can be moved in or out depending on how many solar panels are being carried. The carrier can hold up to two solar panels at a time. See Figure 3.
